AI-generated executive summary

Are we on track: consensus at 9,992,684 units (\$869,882,171 CAD) sits above FY budget by 1,272,492 units (+14.6%) — within acceptable range.

What changed: consensus moved +12.5% month over month, with 0 planner overrides on the table this cycle.

Why: not enough closed months yet to score overrides against the LightGBM (gradient boosting) baseline; 15 supply gaps in the 0–3 month window put risk of missing sales.

Revenue at risk: \$150,820,006 CAD combined — \$11,798,458 from supply constraints, \$139,021,548 from demand variability. \$2,225,658 CAD of on-h SKUs) is at risk of expiring before it sells.

Decisions required: 19 items below need an owner’s call this cycle, representing \$62,560,665 CAD of combined financial exposure.

Watch list: 3 new-product events (623,000 launch-driven units) across 3 materials, and 3 regulatory reviews pending a Board-level decision.

Decisions requiring attention

Program	Recommendation	Owner	Urgency
E&O Recovery — HIGHMARK 56.78LT CA	Review markdown, redeployment, or write-off options	Brand Manager 2	No fixed d

SCENARIO COMPARISON

Decision simulator

Compare the cost of action against the cost of doing nothing - with transparent assumptions.

BLUESTEM 450LT (BLUESTEM-1027)

Try an ambiguous example: Diquat (thin margin, close call) →

Price / unit	Standard COGS	Expedited COGS (production)	Expedited COGS (delivery)	Volume at risk
117.94063847977	74.3	85.45	80.25	18871

Standard COGS pre-filled from this material's margin % (37.0%) — margin data is synthetic, adjust freely.

Scenario	Revenue	COGS	Profit	Margin %
Baseline (no constraint)	\$2,225,658	\$1,402,115	\$823,542	37.0%
Do nothing (accept stockout)	\$0	\$0	\$0	—
Expedite production	\$2,225,658	\$1,612,527	\$613,131	27.5%
Expedite delivery	\$2,225,658	\$1,514,398	\$711,260	32.0%

Net profit protected by expediting vs. doing nothing

\$711,260

Margin given up vs. a normal (unconstrained) sale

\$112,282

DECISION LENS

Revenue protected · Margin trade-off · Break-even threshold

EXECUTION FOLLOW-THROUGH

Action tracker

Decisions move into accountable follow-through - linked to the constraint or event that created them.

Actions

RAID log and regulatory review pipeline, linked to the material, event, or constraint that generated them where known.

Actions (20)

Regulatory (PMRA)

+ New action

Product family

all

NEW (8)

In-month production reschedule to recover volume.

Seed Treatment

Owner: Supply Planner 2

Due 2026-07-29 (overdue)

→ Constraint: AGRIVEIL-1007

Edit

Prioritize sell-through allocation before shelf-life lapses.

Herbicides — Cereal

Owner: Supply Planner 1

Due 2026-07-29 (overdue)

Edit

ONGOING (6)

Update supply plan — next month's production run.

Seed Treatment

Owner: Supply Planner 2

Due 2026-08-06 (due soon)

→ Constraint: PURENUTRIENT-1008

Edit

New product listing — confirm first-sales timing.

Herbicides — Cereal

Owner: Supply Planner 1

Due 2026-08-06 (due soon)

Edit

A visible path from exception → decision → owner → due date.

One operating rhythm across commercial, supply and leadership teams.

Decision Log

Agreements and open points from this cycle's discussion — August 2026 — Sample Cycle (Fictional Demo Data). Escalate unresolved items to the Executive/S&OP meeting and export the review presentation below.

LIVE-READY (SIMULATED)

Zoom meeting notes connector

With Zoom OAuth and the AI Companion webhook, agreements and open questions can be pulled straight from the call transcript instead of typed by hand. Until that connection is approved, this simulates what the meeting-summary webhook would report — pulling in recently resolved RAID items as agreements and the Executive Dashboard's flagged decisions as open items, pre-escalated.
